VAV INSTRUMENTS (SAFE AND SECURE)

•FEATURE SELECTIONS

- •High and low temperature alarms.
- •Temperature data logger.
- •Temperature Chart Recorder.
- •Computer Interface & software.
- •Data store memory & print function.
- •Alarm system with rechargeable battery backup.
- •Alarms for open door, sensor fault, condenser fault etc.
- •Voltage safety system.
- •Dual door system with inner Glass door.
- •Vacuum insulated Glass door system.

ICE LINED REFRIGERATORS

Ice lined refrigerators are designed for storing life saving vaccines. our sturdy and reliable Ice Lined refrigerators with unique design innovations are specially designed to store vaccine products at a controlled, stable temperature and provides a means of storing vaccines and medical supplies. These Ice Lined Refrigerators with a Temperature range of 2 Deg. C to 8 Deg. C come with a highly efficient backup system of 20 - 24 hours. our Ice Lined Refrigerators are designed to maintain the COLD CHAIN which is a must feature of Ice Lined refrigerators for routine & emergency vaccine handling.

Strong and reliable refrigeration is the main feature of ice lined refrigerator. The unit is fitted with a digital electronic temperature controller cum indicator for easy readability along with high & low alarm system. The heart of the system is a highly efficient compressor and condenser with state of the art accurate Temperature Controls constrained to work with low energy consumption.
